Please reject NAB petition 04-160! My quality of life and driving safety have vastly improved since purchasing XM Satellite Radio. I pay for it monthly and have the right to use it. Our payments go towards adding beneficial local stations like traffic and weather. These stations help me to plan my day and to be a more productive person. Regular radio stations contain way too many commercials which cause me to change the channel often, thus running the risk of having an auto accident due to distraction in the car. Please allow me to continue listening to what I pay for and allow XM to provide those paid services to me.
